

Why we should leave the EU.

By James H. Bush

- Our trade with the EU is in crisis. In 2014 we had a record balance of payments deficit of £98 billion. The deficit with the EU was £109 billion, costing £4100 per household. We had an £11 billion surplus with the rest of the World. (Ref. ONS Pink Book 2015.)

- Our exports to the EU are very low in relation to the size of our country. Switzerland exports much more per household and is not in the EU.
